

Qasim BARSHOVI is an international petroleum expert with over than 40 years experience in the oil industry. Much of his experience is served in the oil movement, custody transfer measurement, oil accounting, loss investigations, oil loss control and its related statistical analysis and standards development.

Before joining SGS Geneva in 1983 as Technical Director, he has spent more than 10 years in NIOC Export Control & Technical Inspection in various crude oil ports and terminals including Kharg Island.

He is a member of several international petroleum standards institutes and organisations committees and their working group. He has represented Switzerland, Swiss National Standards (SNV) in ISO TC-28 Technical for several years for all petroleum related standards.

Qasim is internationally known and recognised within the oil industry for his more than 25 years of outstanding experience in presenting petroleum custody transfer measurement and loss control seminars all over the world. In that context and capacity he has written several technical papers on petroleum custody transfer measurement and minimizing its risks and measurement uncertainties. He has jointly worked for over 10 years with the University of Texas at Austin, Continued Education Unit, and he is also recognized as their (UOT) outstanding instructor.

Before taking his retirement in April 2013, **Qasim** was holding the position of the Technical Governance & Training Manager of SGS Middle East in Dubai, UAE, with responsibility for Middle East (including Pakistan, Djibouti and other Near East countries) regional technical, operational and commercial support and contracts management.

Qasim is currently acting as a part time petroleum consultant from his base in Geneva, Switzerland, and spending certain leisure and free time with photography in the area around.
